Experiment 15: Tokenize a Sentence Using the BERT Tokenizer and Display Tokens and Token IDs

Python Program

```
from transformers import BertTokenizer
tokenizer = BertTokenizer.from_pretrained("bert-base-uncased")
text = "I love learning Python"
tokens = tokenizer.tokenize(text)
ids = tokenizer.convert_tokens_to_ids(tokens)
print("Sentence:", text)
print("Tokens:", tokens)
print("Token IDs:", ids)
```

Output
