3. Design Zero-shot, One-shot, and Few-shot prompts to summarize the following article into 50 words. Compare the generated summaries based on accuracy, completeness, and readability.

python program :

```
from transformers import pipeline

llm = pipeline("text-generation", model="gpt2")

article = """Artificial Intelligence helps doctors detect diseases,
analyze medical images, monitor patients, and support treatment
decisions. It can improve healthcare efficiency, but doctors
must verify AI results to ensure patient safety."""

prompts = {
    "Zero-shot": f"Summarize this article in 50 words:\n{article}\nSummary:",
    "One-shot": f"Example: Text: AI helps students learn. Summary: AI supports personalized education.\nText: {article}\nSummary:",
    "Few-shot": f"Text: AI helps farmers monitor crops. Summary: AI supports crop monitoring.\nText: AI helps doctors detect diseases. Summary: AI supports disease detection.\nText: {article}\nSummary:"
}

for name, prompt in prompts.items():
    result = llm(prompt, max_new_tokens=60, do_sample=False,
                 pad_token_id=50256)
    print("\n" + name)
    print(result[0]["generated_text"])
```

Output :

```
PS C:\Users\SAMSUNG\OneDrive\Documents\Generative lab\CO2_Practical EXercises> & C:\Users\SAMSUNG\AppData\Local\Progra
ms\Python\Python314\python.exe "c:/Users/SAMSUNG/OneDrive/Documents/Generative lab/CO2_Practical EXercises/experiment3
.py"
Zero-shot
Summarize this article in 50 words:
Artificial Intelligence helps doctors detect diseases,
analyze medical images, monitor patients, and support treatment
decisions. It can improve healthcare efficiency, but doctors
must verify AI results to ensure patient safety.
Summary:
Artificial Intelligence (AI) is a new technology that can help doctors diagnose diseases,
analyze medical images, monitor patients, and support treatment. It can improve healthcare efficiency, but doctors mus
t verify AI results to ensure patient safety.
Artificial Intelligence (AI) is a new technology that
[transformers] Both `max_new_tokens` (=60) and `max_length`(=50) seem to have been set. `max_new_tokens` will take pre
cedence. Please refer to the documentation for more information. (https://huggingface.co/docs/transformers/main/en/mai
n_classes/text_generation)

One-shot
Example: Text: AI helps students learn. Summary: AI supports personalized education.

Best-performing prompt: Prompt 3

--- REFINED PROMPT ---
```

```
--- REFINED PROMPT ---

Explain exactly three benefits of Artificial Intelligence
in education. For each benefit, provide a clear explanation
and one practical example. Use simple, accurate language.
Present the answer in a numbered list with short headings.
Avoid unsupported claims and keep the response concise.

Result: Prompts evaluated, compared, and refined successfully.
